

JOBY® ballhead

for gorillapod
SLR-ZOOM™

PRODUCT OVERVIEW

Designed to work with the popular Gorillapod SLR-Zoom model tripod, the Joby Ballhead for Gorillapod SLR-Zoom affords users the ability to easily tilt and pan their cameras, while still enjoying the versatility and unwavering support of a Gorillapod on virtually any surface!

Built with the serious photographer in mind, the Joby Ballhead is lightweight and compact, yet still robust enough to support SLR cameras with zoom lenses. It further extends the functionality of the Gorillapod by allowing even more creative camera positions and an improved ability to capture great shots!

While it is optimized for use with the Gorillapod SLR-Zoom, the Ballhead can accommodate both 3/8" and 1/4" threads, allowing it to be used with virtually any tripod. The Ballhead also includes a quick-release clip with bubble level that can remain attached to a camera for effortless, instant setup and perfectly level shots every time!

PRODUCT FEATURES

- **Full 360-degree panning, and 90-degree tilt.** Position your camera at virtually any angle; get portrait or landscape shots with ease.
- **The slim-line quick-release clip with bubble level** stays connected to your camera and snaps into the Ballhead for nearly instant setup.
- **Optimized for use with the Gorillapod SLR-Zoom,** the Ballhead supports 3kg (6.6lbs) and can be used with virtually any tripod.
- **Adjustment knob easily locks the Ballhead into place,** securing it tightly.
